8TH GRADE
COMPUTER APPLICATIONS

Course Description: This course is an extension of the computer application concepts that you learned in 7th grade. You will learn the applications through a series of hands-on computer units. Emphasis of the course will be on the successful completion of projects and labs that were taught within the class. You will be encouraged to use your knowledge and creative talent to complete the activities. The units are listed in the table below.

This is a 6-week term. Please check PowerSchool often.
Students are graded on the Learwood Letter Grade Scale for the completion of the Units.

Unit	SOFTWARE/APPS	TIME FRAME	POSSIBLE POINTS
Advanced PowerPoint	MS PowerPoint	1 week	50
Spreadsheets in the Business World	MS Excel	2 weeks	50
Intro to Computer Programming & Coding	Code.org Code Monster Khan Academy Motion Control Script	2 weeks	50
Computer Animation	Animaker SoundTrap Audacity Adobe Premiere Elements	1 week	30
