

Get Started!

Code Piano is a microchip connected to 8 buttons and a speaker. You can learn to program it to sound like a keyboard or a DJ booth.

Code Piano plugs into a USB cable. The USB cable plugs into your PC. Visit www.letsstartcoding.com for help getting started!

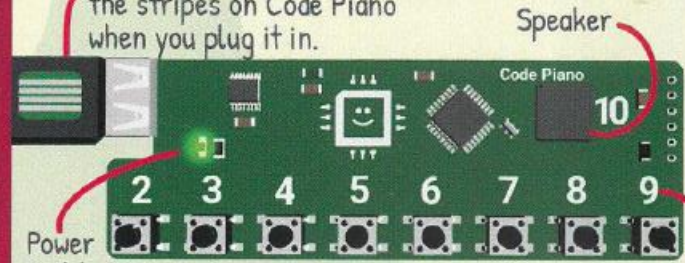

The code reference cards in your kit help you learn important code concepts and syntax. Keep them nearby!

Made by Let's Start Coding, Louisville KY 40204. info@letsstartcoding.com
