

8TH GRADE

COMPUTER VIDEO EDITING - ELECTIVE

8th Grade Video Editing

Course Description: Video Editing skills are used in a variety of industries, from film and television to video advertising. Learning video editing skills can help aspiring content creators reach a wider audience with professional quality content. This course is designed for students to learn multiple video editing techniques. The students will learn these techniques through several hands-on activities and projects taught within the class. Students will be encouraged to use their creative talent when completing the video editing projects. The projects, software and apps for this course are listed below.

This is a 6-week course and the students are graded on the Learwood Letter Grade Scale for the completion of the units.
Please check PowerSchool often.
